Artist: Yumiko Glover

Title:
Transience of Water

Artist Statement
Transience is a series that reflects upon the philosophy of the transience of life that distills the aesthetics of impermanence: our basic reality is always in a state of flux. I created Transience of Water based on my inspiration from the interior of the Mughal Gallery combined with my memories of the ocean scape by the museum site. While the nature surrounding its structure constantly changes, the multiple afterimages continue to remain inside of me and has become a strong connection. By overlapping the residual images of motifs from the gallery space, watermarks, and clouds, I explore the aesthetic of the unexpected impermanence of nature, the material world, and moreover, the life and death circle with an emphasis on the preciousness of being in the present moment.
